Graduate Courses of Most Interest to Teachers

A. Courses which meet in the late afternoon and evening:  

PHY 570 Introductory Physics Revisited for Teachers  
PHY 579 Special Topics for Teachers  
(note: The following two courses are taught by the Department of Physics and Astronomy but do not carry a PHY designator, so may not be suitable for some purposes.)  
CEI 544 The Mystery of Matter: From Quarks to the Cosmos  
CEB 558 Hands-On Science with Cosmic Rays  

B. Courses which meet during weekdays:  

PHY 515 Methods of Experimental Research I  
PHY 571 Electromagnetic Theory for Teachers  
PHY 573 Mechanics for Teachers  
PHY 576 Thermodynamics and Statistical Mechanics for Teachers  
PHY 578 Quantum Physics for Teachers  
PHY 580 Special Research Projects  
PHY 582 Optics Rotation  
PHY 585 Special Study  
PHY 600 Practicum in Teaching  

C. Other graduate courses:  

A full range of graduate courses in physics is available for students with sufficient mathematical background.
